A Report on

Mastering Resumes, Interviews, and Career Strategies

The Alumni Interaction titled "Mastering Resumes, Interviews, and Career Strategies" took place on September 21, 2024, from 2 PM to 3 PM. Mr. Manish Jain, a Data Engineer at Amazon, was the resource person. He emphasized the importance of proper formatting, avoiding grammatical errors, and highlighting relevant skills in the resumes. He also recommended that students review the resumes of industry professionals for guidance.

During the interview discussion, Mr. Jain shared a refreshing perspective. He emphasized that interviews are generally conducted with a hiring mindset, so treat them as discussions. He suggested researching the company and relevant domain for which the candidate appears. He also suggested appearing for the mock interviews.

In the end, he encouraged students to learn and grow and addressed all their questions and concerns. The activity was coordinated by Prof. Dhananjay Joshi.
