

Mr. Ninad Chobe from the AIML Department secured 3rd place in the Hack-AI-Thon

Mr. Ninad Chobe from the AIML Department secured **3rd place** in the prestigious Hack-AI-Thon organized by LexisNexis Risk Solutions. Competing against over 60 talented participants, Ninad impressed the judges with his innovative project on **Optical Character Recognition (OCR)**.

His project focused on developing an efficient solution for extracting and processing text from complex image data using advanced AI techniques. The innovative approach enhanced both the accuracy and speed of text extraction, showcasing potential applications across multiple domains.

Ninad expressed his gratitude for the continuous support and guidance from the department, which he credited as instrumental in his success. This remarkable achievement not only highlighted his academic and technical excellence but also brought valuable insights into the latest trends and challenges in AI and OCR.
