Vision : Play a distinct role in providing excellence in engineering and management education thereby creating human resources of value to industry and society both at national and international level.

Functions of the Planning and Monitoring Board

- To recommend to the Board of Management the broad development programs in liberal and professional education, having regard to the objectives of the university and the regional and national needs of the country.
- To review the maintenance of standards of instruction, education, evaluation, research, training, extension, and collaboration among university officials.
- To arrange for the inspection of colleges and academic audits of its institutes and schools based on their academic performance and vision.
- To recommend to the Board of Management and Academic Council the inspection of the constituent colleges, hostels, hospitals, and rural health centres in order to assess their academic performance and needs, wherever necessary, with a view to maintaining efficiency and ensuring adequate student amenities and health services.
- To advise the Board of Management and Academic Council on any matter which it may deem necessary for the fulfilment of the objectives of the university.
- To prepare the perspective or development plan of the university.

Vision : Play a distinct role in providing excellence in engineering and management education thereby creating human resources of value to industry and society both at national and international level.
